I am a mother, primary school teacher and permaculturalist. I built a home in Denmark 14 years ago, raising my son & daughter as a sole parent.

Like many residents, we found a safe, healthy place to grow. I value clean air, water and healthy food production. I will champion these values to allow Denmark to be the Sanctuary it has been for so many. Our shire is a glowing example of healthy lifestyle choices.

I am also an artist, with an active history in Denmark Arts. Creative industries are important economic and well-being engines in regional communities, which I will fully support.

I believe in fair, honest and transparent decision-making. My aim is a balanced approach; always considering the value-for-money for rate-payers.

I advocate for economic development that supports residents; not only tourism, but local small business and low-impact housing that creates economic opportunity and adds vibrancy to community life.
