

Location	Works Required in area Highlighted in red boundary
Denmark Tip shop area, East River rd	<p>Create parkland clearing with 10m clearance around the Tip shop. The area is to be slashed to 20cm above surface, to allow native surface fuel to remain in-situ. Larger vegetation in this zone is to be trimmed to 2m above surface, and trees pruned so there is no fuel connectivity between neighbouring trees, where possible. The young bluegum (orange dot on map) immediately adjacent to the tip shop is to be entirely removed.</p>
