The following messages are to be included: The park is a cherished natural asset that attracts a significant number of visitors, especially during peak seasons. Tourism brings numerous benefits to our local shire, such as economic growth, job creation, and the promotion of cultural exchange. Nevertheless, it also presents challenges that need to be addressed to preserve the park's environment. Council acknowledges the work and commitment the Department of Biodiversity, Conservation and Attractions has shown to the park thus far, including the provision of improved infrastructure. However, with the increasing number of visitors and the State Government's push for domestic tourism, it is crucial to consider the impact on the park's ecosystem. Our community is asking how the health of the National Park will be preserved going forward. We are seeking the department to provide information to the community and Council on the measures that are planned for the short and medium term to manage visitor numbers effectively. As the Shire is a key stakeholder, we ask that these measures align with our commitment to environmental protection and sustainable tourism. We believe that a collaborative approach between the State Government and the Shire of Denmark can lead to innovative solutions that ensure the park remains a pristine and welcoming place for both residents and visitors.
